

At last!

A book about geology and landscapes that anyone can understand . . .

Written particularly for

- land managers and volunteer groups
- teachers and students of environmental subjects
- geologists interested in a different approach
- ecologists
- field naturalists
- outdoor educators and activity leaders
- anyone interested in our natural environment

Special features

- thoroughly researched using primary sources
- geologically accurate, but written in accessible language
- pitched at levels from introductory through to experienced
- Parts 1 & 2 geologically applicable worldwide; Part 3 focuses on local areas in southeastern Australia
- shows how to read the stories of the past as embedded in the rocks
- examines relationships between geology, landforms and vegetation
- includes suggestions for group and individual field activities
- 660 pages, in full colour; hard cover
- over 1870 photographs, digital images, maps and diagrams
- has a comprehensive glossary and user-friendly indexes

Stories beneath our feet: exploring the geology and landscapes of Victoria and surrounds
